

What the fuck is THAT?

Your weenie is quite...uncommon. No one has ever made any comment on that...trump? Are you sure you have undressed in front of a woman EVER?

Oh my God, what a stench ! There's no way I'm gonna suck that, that is so GROSS. I think I'm gonna puke if you don't go wash it. And use a lot of soap and rince twice, or you can get the fuck out of here and go back to whichever remote country you live in. I can't believe there's such a country where males are not made suitable for women. Indeed, I mean circumcision. See, you're not an ignorant, you're just disrespectful to women. Go now, I'm gonna get ready for the time of your life. And if you don't get back as clean as any decent male, the only thing you'll get from me is a memorable sight.

What a relief now you don't smell like shrimps forgotten in a trunk. Usually I love to surrender to males and let them do me the way they like, but of course today I couldn't even imagine behaving this way with an uncut guy. The problem is, I have my urges and you're the only one available for the moment. So I decided to give you a preview of what you could get if you decide to become a real man soon. As a symbol of our session today, I have removed my collar and you will wear it. And I will just wank your noodle a little, to make you realize that any respectable man should have so little skin left on his shaft that even when I do what I'm doing to you right now, his glans should stay totally exposed. That's what all my friends, and any normal woman, has the right to expect from a decent sex friend. I hope you realize how abnormal you are by the amount of excessive skin you have.

And since I won't have my usual ramming today, I will use my emergency black dildo behind. You will have the privilege to watch me cum, but you will not wank off today and keep your hands behind your back like a punished kid. I think I'm getting soft, there were times you would have got my knees in your groin, daring to produce such a nasty thing to me.

As long as you have your gross uncut cock, you can forget about this (and you must have heard about my skills with my tongue, practically everyone surrenders and can't wait to fuck me ; they shoot their thick loads all over my face and tits, and I have to lick their balls to fuel them for a restart and a proper fuck ; I love it when I see their faces just when they fight against the point of no return, helplessly, it gives me such a sense of power over males, and I laugh and laugh to hit the proper spot, I mean their manhood. When I think about those fucking intactivists who pretend to assert that a circumcised guy is much less sensitive to fellatio ; if it were true, uncut guys most probably would shoot their loads in less than ten seconds with me, hi hi....

And of course you can forget about that too. Why would I risk a cervical cancer for such a pitiful shag, with a cock sliding inside its shaft like a loose sock? Why take the chance, when there are tons of males with shafts so tight they can hardly wank by themselves and need a soft cunt to welcome their hardened glans and give some comfort to their sacrifice, even if it's for a good cause, I mean our climaxes.

Now you know what you have to do and you can't hide behind pitiful excuses anymore. You can thank me for I've offered you an opportunity to show you have the balls to go get circumcised, so you can make your circumcision a real turn-on and not only a surgical procedure. And you will have someone to stick to in your mind when the blade starts making you a man, without any anaesthetics of course. What? Yes, thank you I know some practitioners give their patients a shot, but where you are to go, there's no such thing : soon to be men have to show they can endure a little pain for a lifetime gain, as they say. And when you go there for an appointment, you'll understand right away : the surgeon is a friend of mine, of course she totally shares my conceptions about men and would be appalled not to give a man the opportunity to show he's got balls in front of an audience. Yes, not only the nurses, but also all the viewers will be online not to miss the show. Your face could be partly hidden if you prefer, but not your genitals indeed...Believe me, of all the guys who went through the procedure, those who didn't cry like sissies or begged for their mommies gained such a reputation that they are regularly used as fuck buddies by my friends or myself. And they don't have time to feel sorry for their foreskin, they don't need to wank off anymore and they're glad they are less sensitive to irritations due to excessive friction...
